OFFICE ACTION

1. Applicant's election of the Group I invention (claim 1-7) and specie A (Figs 1-100) without traverse in paper no. 4 filed on 01/27/04 is noted. Claims 8-16 stand withdrawn (37 CFR 1.142) as being drawn to a non-elected invention.
2. The abstract is objected to because it contains the term "means". Correction is required.
3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Art Unit: 3652

4. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated (lacking novelty) by Hayashi, e.g. see fixed shelves 24 that are located within the rotatory path of 22 and 36.
5. Woodruff et al and Teranishi show rotary storage device with eternal article transfer means.
6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to R.B. Johnson whose telephone number is (703) 308-2565. The examiner can normally be reached on Monday thru Thursday from 6:30-9:30 A.M. to 5:00-8:00 P.M.
